Professional Summary

Data-driven Production Engineer currently completing a Master's in Big Data & Analytics. Experienced in designing data pipelines and analytics solutions that turn complex datasets into actionable insights. Proficient in Python, SQL, and BI tools, with practical experience in cloud platforms and orchestration frameworks. Adept at collaborating across teams to improve operational efficiency and implement scalable data products.

Professional Experience

Competition Insights Analyst - eDreams ODIGEO

Barcelona, Spain - November 2025 → February 2026

- Performed competitive and market analysis for multiple business teams using Google's data ecosystem (BigQuery, Looker, and Google Sheets).
- Designed and developed Python-based operational tools that automated workflows and increased efficiency.
- Collaborated with cross-functional teams to interpret data and propose improvements aligned with strategic objectives.

Data & Operations Analyst - Ártico

Canelones, Uruguay - November 2022 → June 2024

- Directed the company-wide implementation of a Transportation Management System (TMS), coordinating cross-departmental efforts and ensuring timely delivery.
- Developed Python algorithms for automated analysis and optimisation of warehouse slotting for 1000+ SKUs.
- Analysed supply-chain operations, designing tools to manage complex networks of suppliers, warehouses, and clients.
- Conducted data-driven assessments to identify inefficiencies and define improvement strategies across the supply chain.
- Created Power BI dashboards that streamlined decision-making and enhanced operational visibility across interdisciplinary teams.

Supervisor - Mayohogar

Montevideo, Uruguay - February 2022 → October 2022

- Managed and supervised personnel, boosting team productivity and operational efficiency.
- Streamlined warehouse operations, optimising space utilisation and inventory management.

Co-founder - UnMonton Board Games

Uruguay - 2019 → 2021

- Co-developed and launched a board-game brand, handling game design, prototyping, production, and marketing.
- Managed end-to-end product lifecycle, from industrial printing to sales and customer engagement.
- Sustained the business for two years through effective marketing and community building.

Education

Master's in Big Data & Analytics - EAE Business School, Barcelona

October 2025 → July 2026 (in progress)

Bachelor's Degree in Production Engineering - Universidad de la República, Montevideo

2019 → 2023

- Thesis: *Optimisation of Routes in Frozen Goods Distribution*. Designed a mathematical model to minimise distribution costs under complex constraints, achieving results superior to commercial software and earning a 100 % grade plus recognition at the XXII South American Conference of Industrial, Production and Mechanical Engineering.

Certifications

- Databricks Fundamentals Learning Plan
- Agent Evaluation on Databricks
- Certificate in Proficiency English (CPE - C2), Cambridge University
- IBM Project Manager Professional Certificate
- Data Modelling, Transformation & Serving - DeepLearningAI (Coursera)
- 4-Week Cultural Studies Exchange, Torquay International School
- Python for Data Science & Machine Learning Bootcamp - Udemy
- Microsoft Power BI Desktop for Business Intelligence - Udemy
- The Complete SQL Bootcamp: Go from Zero to Hero - Udemy

Skills

- **Languages & Tools:** Python, SQL, Power BI, BigQuery, Looker, Pandas, NumPy, SQLAlchemy, Matplotlib, Docker, Git.
- **Data Engineering:** ETL/ELT pipeline design, data modelling, dashboard development, data cleansing and enrichment.
- **Soft Skills:** Planning & organisation, teamwork, problem-solving, public speaking.

Personal Technical Projects

- **Daily Sales ETL Project - Python ETL pipeline.** Built a modular ETL pipeline to process and load sales, weather, and zipcode data into a MySQL warehouse with automated cleaning, enrichment, and idempotent loading.
- **Production Thesis - Call Center Performance Optimisation (in development).** Developing an AI-powered conversational analytics system on AWS using LLMs to extract insights from call transcripts and improve performance metrics such as AHT and FCR.
- **Coffee Big Data Project - End-to-end data pipeline.** Simulated sales data, stored it in PostgreSQL, created Power BI dashboards, and built predictive models (Random Forest, LightGBM) orchestrated with Airflow.
- **Screen Time Tracker - Streamlit & Google Sheets app.** Developed a Streamlit application to track and analyse daily screen time with automated metrics and visualisations.

Volunteer Experience

Recreational Activities Leader - Colegio Inglés

Montevideo, Uruguay - March 2016 → December 2023

- Led recreational activities and camps for youth, fostering teamwork and creativity.
- Designed and managed group events, strengthening leadership and organisational skills.
